EXPERIENCE

OLIESTA SOFTWORKS
Freelance Web Developer
Duration : **July 2022 - Now**

From around July 2022 up to now, I have been doing projects for various people and organizations in a freelance capacity. I did not let my inability to quickly secure a job inhibit my productivity. To see what I have been doing, you can check "geraldsigauke.netlify.app". What I typically do is learn from tutorials and add my own two cents to what I learned from the tutorials. Even though -- during my tertiary education -- I was taught Python and Java, plus the PHP, Javascript, CSS, HTML and XML way of doing things, I went on to chose the MERN stack. My aim was to master Javascript in order to unlock the door to React Js. Mastering the MERN stack (the React Js version) would unlock the door to React Native and its version of the MERN stack. Afterwards, learning Typescript would make me extremely valuable. Right now I am still mastering the MERN stack (the React Js version).

EDUCATION

University of the People - California, United States of America
Bachelors Degree in Computer Science

Passing Year - **2022**

Grades : **2.9**

University of the People - California, United States of America
Diploma in Computer Science

Passing Year - **2020**

Grades : **2.6**

St Augustine's High School - Penhalonga, Zimbabwe
High School Diploma ('A' Level Certificate)

Passing Year - **2008**

Grades : **All Subjects Passed**

St Augustine's High School - Penhalonga, Zimbabwe
High School Diploma ('O' Level Certificate)

Passing Year - **2006**

Grades : **All Subjects Passed**

PROJECTS

hazyviewpetsindistress.netlify.app
A Landing Page For A Fund Raising Organisation. I used React JS, Tailwind and React Icons.

oliestaafterschoolcare.netlify.app
A Landing Page For An Afterschool Care Business. I used React JS, Tailwind and React Icons.

oliestafashions.vercel.app
This ecommerce site is my first foray into Next JS. I used Material UI to create the front end. I used Node Js, Express Js and Mongo DB to create the backend. This app uses PayPal as its payment gateway.

geraldsigauke.netlify.app

My personal portfolio is a React JS web app. I used SCSS, Flex and Framer Motion to create the front end. I used Sanity IO to create the backend.
